### **DETAILED ACTION**

Applicants' arguments, filed 3/25/03, have been fully considered but they are not deemed to be persuasive. Rejections and/or objections not reiterated from previous office actions are hereby withdrawn. The following rejections and/or objections are either reiterated or newly applied. They constitute the complete set presently being applied to the instant application.

### **PRIOR ART**

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 25-27, 31-37, 47, and 48 are rejected under 35 U.S.C. 102(e)(2) as being clearly anticipated by Tokizane et al. (P/N 4,811,217; Ref. AA1).

This rejection is reiterated and maintained from the previous office action, mailed 9/26/02. Applicants argue that the reference does not teach a focused library. In response the focused library teaching was summarized in the previous office action, mailed 9/26/02, as being disclosed as a search utilizing a query structure such as structure 2 to result matches which are clearly focused thereby. Thus, this argument is non-persuasive as being contrary to the factual basis for this rejection.

Art Unit: 1631

Claims 1-3, 7-27, and 31-48 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Young et al.(EP 0,818,744; Ref. AO1).

This rejection is reiterated and maintained from the previous office action, mailed 9/26/02. Applicants argue that the reference does not teach various limitations of the instant claims such as selection of a set of enumerated compounds, deconvolution in associated building blocks, and generation or extraction of a focused library and cite passages from the reference. In response these very passages support the rejection as they cite selecting from a virtual library, further fragment selection and listing accessible reagent compounds (deconvoluting into building blocks), and producing candidate compounds (a focused library generation). Therefore, applicants arguments clearly support the rejection which is therefore maintained.

No claim is allowed.

**THIS ACTION IS MADE FINAL.** Applicants are reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of

Art Unit: 1631

the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
